- HTML, CSS, JS, jQuery
- Bootstrap
- SQL
- Python
- IOT
- Drone Programming
- Blogging and Content Writing

Language

English

Hindi

Marathi

Projects

2018
Encryption and Decryption File software
In C Programming complete a VAP project where we put the file name in software so that it will encrypt the file keeping the original file untouched after that on the receiver's side we can have a decrypted file while the encrypted file is untouched.

2019
Automated farm
In Arduino programming made a VAP project where IR sensors, RFID, water sprinklers, soil moisture sensor, and Arduino UNO have been used to create an intrusion alert and automated water sprinkler system for the farm.

2019
Automated seed sowing drone
Worked in drone tech and made a VAP project, Where the drone is used to map the farm and then set off automatically and plant seeds at a certain distance covering the whole land and come to the starting point.

2021
Gender Classification
Gender classification is the task of identifying the gender of a person from an image or video using a Deep Neural Network.

2022
Portfolio
A Personal Portfolio Website made using HTML, CSS, and JAVASCRIPT where you will get to know all about me.

Experience

Sep 2020 - Oct 2020

Hacktoberfest-2020, DigitalOcean
Open source contributor

This was my first ever hacktoberfest participation, and it helped me to explore and contribute to open-source projects. Hacktoberfest is an excellent platform for all of us to explore and contribute to open source projects, It helped me to improve my skills, and gain confidence.
